Join Us! October 17th-18th in Toronto!

The Training Institute of Geneva Centre for Autism is proud to present Dr. Peter Vermeulen’s Canadian Tour on Context Blindness and Autism Spectrum Disorder. Dr. Vermeulen is a psychologist and Co-director of the Centre for Concrete Communication, a training and education center specializing in Autism Spectrum Disorders in Belgium.

Dr. Vermeulen, along with our Training Institute Faculty, will be travelling to St. John’s, Newfoundland to launch the tour then off to Montreal, Toronto, before wrapping up in Thunder Bay, Ontario. This is your personal invitation to attend and participate in this event.

Dr. Vermeulen’s insights regarding context blindness deliver fresh perspective on how individuals with an Autism Spectrum Disorder (ASD) perceive and respond to their environment. Using lots of examples from his own clinical practice, Dr. Vermeulen will share his compelling case for how context blindness directly impacts an individual's cognitive abilities, thus impacting communication, social cognition, and behavior. Understanding context blindness leads to a better understanding of ASD.

We are very excited to have Dr. Vermeulen join us, enabling his work to be brought to the community of Toronto. Please help us spread the word by sharing this information with your colleagues and interested families. Dr. Vermeulen will deliver a lively interactive learning experience and I will facilitate a Q & A session. Don’t miss this important event.
